Math 151, Fall 2015

Workshop Guidelines

(1) Every week you will be assigned a workshop consisting of 3 to 6 problems.

(2) You will work on the workshop during the workshop period in groups. During this time both the peer mentor and I will be circling the room assisting with the workshop.

(3) At the end of the workshop I will assign 1 to 2 problems (from the workshop) to be handed in at the start of the next week’s workshop.

(4) You should feel free to work with other students outside of class on the workshop problems, but the write-up should be solely your own work.

(5) Late workshops will not be accepted. If you cannot make it to the workshop you may email me your workshop solutions. The electronic copy must be in my mailbox within 15 minutes of the start of your workshop period. The email must have the subject heading:

Math 151: Section (your section number): Workshop (that week’s workshop number)

(6) Your lowest two workshop grades will be dropped.

(7) From these questions one will be rigorously graded from which you will receive up to 10 points. Five points will be for the mathematical correctness, while the other five will be for clarity and style of the write-up.

An approximate rubric is as follows:

Mathematical Correctness:

(1 point) Correct result

(2 points) Setting up the correct computations

(2 points) Carrying out the computations correctly

Clarity and Style of Write-Up

(1 point) Clear layout on page

(1 point) Correct spelling and grammar in complete sentences

(2-3 points) Explanatory narrative and justification for computational steps

(1 point- where applicable) Neatly drawn and labeled graphs and diagrams
